- **Responsibilities included** keyword research, content recommendations, and link building.
- **Utilized** Google SEO tools and gained knowledge of crawlers, various search engines, and their workings.
- **Contributed** to effective online marketing strategies through these efforts.

Key Projects / Involvements

- **Countries List API:** Developed a dynamic web application using React.js that allows users to explore and retrieve information about countries worldwide. The app features search functionality, displays detailed country information (population, area, capital, etc.), and is designed to be responsive for optimal use on various devices. Deployed on Netlify, the project integrates with a RESTful API for real-time data retrieval. Check it out here: [Countries List API](#).
- **Foodie Hamburger Project:** Explore the Foodie Hamburger Project, a visually engaging web application created using only HTML, CSS, and JavaScript. This project showcases a variety of delicious hamburger recipes and provides an interactive user experience. Users can easily navigate through the content, making it perfect for food enthusiasts and aspiring chefs alike. Check it out here: [Foodie Hamburger Project](#).
- **Focus on Today Project:** Discover the Focus on Today Project, a simple yet effective web application built using HTML, CSS, and JavaScript. This project is designed to help users prioritise their daily tasks and stay organised. With an intuitive interface, users can easily add, edit, and remove tasks, making it a great tool for enhancing productivity. Experience a streamlined approach to task management by checking it out here: [Focus on Today Project](#).

Career Objective

To secure a Full Stack Developer position where I can utilize my expertise in **React.js**, **JavaScript**, **HTML**, and **CSS** to create innovative and responsive web applications, while contributing to a collaborative team environment and driving impactful results.

Technical expertise

- JavaScript
- HTML5
- CSS
- React
